

## Solutions for education

## IT-friendly Audio for Higher Education

The Nureva microphone and speaker bar system offers a professional-grade yet easy-to-use solution for hybrid and flexible learning spaces. With simple set-up and installation, it features auto calibration, Teams and Zoom certification, and integration with the Nureva Console for seamless management. The system amplifies the instructor's voice while ensuring full-room audio pickup, enabling AI tools like Copilot to transcribe and summarise lectures. It supports everything from classrooms to lecture halls with camera tracking, analytics, and remote management for enhanced teaching experiences.

### Nureva® HDL Pro Series

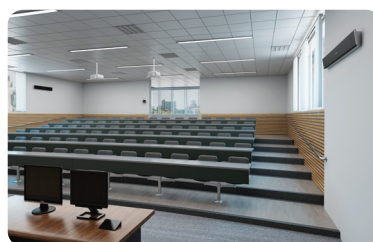

Nureva leads with a focus on designing products that prioritise the needs of IT over those of AV.

It lets the technology do all the heavy lifting so IT teams can focus on strategic priorities instead of constant fixes.

Nureva's audio solutions are simplifying AV management to install, set-up and maintain, in an IT-centric world.

#### HDL410

Pro AV performance for extra-large spaces up to 10.7m x 16.8m

#### HDL310

Pro AV performance for large spaces up to 9.1m x 9.1m

## Key Features

---

### All-in-one simplicity

Plug and play technology with no need to purchase management software, separate DSPs, external speakers or other components.

### Quick, simple installation

Install a microphone and speaker bar on a wall with just two screws. You won't need to take a room offline or deal with unwelcome surprises in your ceilings.

### Seamless camera tracking

Combine Nureva's sound location data with your choice of cameras to make automated tracking and switching easy and effective.

### Full-room microphone coverage

Fill a room with thousands of virtual microphones so there's always one nearby, no matter where people sit, stand, move or face.

### Hassle-free management

Remotely monitor and control devices, receive instant alerts, and gain real-time insights. Automate tasks with customisable APIs for a reliable, hands-off experience.

### Divisible spaces

Easily configure rooms with movable dividers and maintain excellent microphone pickup across the space.

### Continuous autocalibration

Eliminate support calls for poor pickup - Nureva continuously calibrates with every use to adapt to room changes.

### Voice amplification

Ensure every word is heard with built-in amplification that enhances the instructor's voice while preserving full-room microphone pickup for remote participants.

### Teams & Zoom certified

Trust the only microphone and speaker bar solutions certified for larger Teams Rooms and Zoom Rooms. They also work with your go-to room peripherals.
