# About PHILIPS.

## Power and versatility is only the beginning.

Every innovation from Philips Professional Display Solutions is designed for maximum impact. Over 40 years of one on one industry experience with small business and global enterprises has resulted in breakthrough technology development ranging from ultraclear high brightness smart signage to ultra-narrow bezel LCD wall displays.

## Signage collection

Make an impact with the impressive collection of Signage solutions. Super high brightness and ultra-clear resolution brings your content to life for flawless audience engagement and better results. Built with versatility in mind, each display comes packed with features that can be easily adapted for your usage needs.

## Professional TV and Display collection

Power up your business with advanced connectivity, a plethora of smart features and ultra-high resolution picture quality. The Professional TV and Display collection has been purpose built to meet the evolving demands of each business sector. Cutting-edge innovations and superior design come together to help you achieve your goals.

# Solutions for every industry.

**Exceed your industry-benchmark with tailored solutions designed to boost your full potential. Each Professional TV and Digital Display product is designed to unlock more possibilities through the latest innovations.**

## Corporate

From first impressions to fruitful collaborations, Philips displays deliver real clarity and impact. Whether you're rolling out a network of lobby TVs and meeting-room touchscreens. Or installing a standalone video wall in the security office.

## Education

Create an inspiring learning environment—whether you're teaching shapes to pre-schoolers or exploring quantum entanglement. Engage them with touchscreen whiteboards, or show content from four individual inputs on a single display.

## Broadcast

Empower your team and maximise audience engagement. Philips professional TVs and signage solutions are designed to optimise your studio, newsroom and digital centres with dynamic content, versatile connectivity and interactive functionality for perfect broadcasting.

## Food & beverage

Robust displays built to keep going in a 24-hour kitchen. Clear digital menu boards. Touchscreen ordering stations. Vibrant bar and lounge TVs. Philips professional TVs and signage solutions are easy to manage whether you're running a bar, a café, or a hotel restaurant.

## Transportation

Always-on displays in the departure lounge. Ultra-clear video walls in control rooms. Philips commercial TVs and digital signage enable a smoother travel experience—day and night. Whether you're helping travellers find their way or making critical real-time decisions.

## Entertainment

Seamless, bezel-free video walls at a gaming expo. Live sports results broadcast on professional-grade TVs. Whether it's a temporary backdrop or a permanent network solution, Philips professional TVs and signage solutions make it easy to inform and enthrall.

## Public venues

High-brightness digital signage. Touchscreen information stations. Professional TVs with head-turning picture quality. Philips professional display solutions makes it easy to connect with visitors. From wayfinding to the keynote speech—hold their attention.

## Healthcare

Optimise your patient experience. Philips professional display solutions enables healthcare facilities such as aged care facilities, doctor's offices, and clinics to entertain and inform patients and deliver content with smart technology.

## Retail

Be seen. With stunning resolution and crisp contrast, Philips professional TVs and digital signage make a big impact. Whether it's an ultra-high-brightness display attracting attention, or a smart touchscreen that can show content targeted to whoever's looking.

## Explore the products

Experience seamless connectivity, optimised collaboration, and flawless design to suit your space and requirements.

# D Series - Standard 24/7 Displays.

## Flexible & Reliable Signage

Performance meets versatility in the D Series. Ranging up to 98-inches in size, the 24/7 D Series is the perfect choice for content that needs to make a powerful impact in both landscape and portrait orientation. Built-in Android\* provides an endless amount of possibilities.

Available in	32"	43"	49/50**	55"	65"	75"	86"	98"
--------------	-----	-----	---------	-----	-----	-----	-----	-----

### Entertainment

Wow patrons with a screen size up to 98-inches. CMND allows for quick content updates across single or multiple displays, whilst internal MemoryCache and FailOver ensure that content is always running.

### Public venues

Inform and engage visitors in public spaces. The D Series features an integrated system to communicate with devices over the same network connectivity. FailOver ensures that backup content is played if the primary source experiences an outage.

### Retail

Optimise any retail space for a better shopping experience. Easily create and control promotional content across single or multiple displays with CMND, and ensure content is always playing in case of primary source outages with FailOver.

### Corporate

Easily connect and share content for ultra-efficient meetings and presentations. Built-in Android and SmartBrowser provide access to more apps, media content and devices, whilst CMND allows for updateable internal communications in an instant.

### Food and beverage

Easily display menus, update item availability, pricing, and promotions with CMND. Integrated SmartPlayer and internal MemoryCache allow for local content scheduling, whilst FailOver ensures backup content is always available.

### Transportation

Instantly update arrivals, departures and important announcements with ease using CMND. Built-in Android allows for live information and custom software integration from apps, whilst FailOver displays backup transport information in case of a primary source outage. All this with 24/7 operation.

# T Series - Multi Touch Displays.

## Inspire Engagement & Collaboration

The Philips T Series Displays are ideal for multi-finger, multi-user applications - from information delivery, to collaborative learning and presentations. Perfect for way finding, information delivery, education and corporate meeting room applications, these Android powered displays feature anti-glare toughened glass to withstand heavy daily usage, and feature whiteboard mode and up to 20 touchpoints to provide a whole new level of interaction.

Available in	10"	24"	43"	55"	65"	75"	86"
--------------	-----	-----	-----	-----	-----	-----	-----

### Retail

Revolutionise your shopping experience by bringing the digital world into the store. Interactive touch-functionality can be used for product selection, wayfinding, and promotional experiences.

### Public venues

Inform and engage visitors in public spaces. Multi-touch interactivity makes the T-Series perfect for way-finding. FailOver ensures that backup content is displayed if the primary source experiences an outage.

### Hospitality

Multi-touch interactivity keeps guests engaged and informed in any setting. Built-in Android allows for apps and custom connectivity, with up to four inputs being displayed simultaneously through QuadViewer.

### Food and beverage

Streamline customer orders with touchscreen functionality linked to your POS system. CMND allows for menus and promotional content to be displayed on the same screen, whilst FailOver ensures backup content is always available.

### Education

Bring lessons to life and truly engage students with an interactive touch-screen display and new whiteboard mode for collaborative experiences. Built-in Android allows for learning apps and games, whilst CMND allows for custom content to be created and displayed with ease

### Corporate

Deliver a whole new level of collaboration and interaction to your meeting room experience. With a System on Chip (SoC 16GB) integrated processor, businesses can benefit from a sleeker and tidier installation and energy efficiency associated with a reduction in hardware requirements. Small screens are perfectly suited to use as meeting room booking panels with PoE power and capacitive touch.

# X Series - Video Wall Displays.

## Designed for Versatility & Impact

Whether you're running an airport or hosting a conference, a Philips X Series Video Wall Display commands attention and transforms any space into a gigantic content display in either portrait or landscape mode. Presentations, live feeds, and real-time info from multiple sources ensure greater flexibility, whilst Pure Colour Pro boosts luminance for dynamic content that's radiant and engaging. An ultra-narrow bezel allows for near seamless linking for a display of any size, whilst Advanced Colour Calibration ensures a clear image in any lighting condition. Connect as many displays as you like to form a captivating design that fits perfectly in your space.

Available in	49"	55"
--------------	-----	-----

### Public Venues

Designed for 24/7 operation, this Videowall display is ideal for public spaces including points of interest, stadiums, and anywhere else that requires moving content. FailOver ensures that backup content is available in case of a primary source outage.

### Retail

Make an impact with a jaw-dropping Videowall display. Easily create and control promotional content with CMND, keep running costs down with SmartPower, and ensure content is always displayed with FailOver.

### Corporate

Take presentations and corporate branding to the next level. OPS Insert allows for a direct integration of a full-power PC or Android-powered CRD50 module, whilst CMND allows for updateable internal communications in an instant.

### Healthcare

Modernise any healthcare setting with a vibrant Videowall. CMND allows for content integration to display patient queuing, information, and health updates. SmartPower keeps running costs down.

### Transportation

Ensure maximum visibility for transport scheduling and announcements. CMND allows for easy content updates, whilst FailOver displays backup transport information in case of a primary source outage.

### Entertainment

Increase performance visibility with a giant Videowall display that gives every patron a front row view. Advanced Colour Calibration ensure a super clear picture, whilst SmartPower keeps running costs down.

# Case Study.

## - Food and Beverage

### Kwik Trip Boosts Sales with New Revenue Streams.

#### Background

Kwik Trip is a convenience store chain with over 700 locations spread across the main highways of Wisconsin, Minnesota and Iowa. Most recently, Kwik Trip has aimed to enrich their customer experience, while driving sales and creating new opportunities for the brand, by introducing digital signage to meet these strategic company goals and drive higher food revenue.

#### Challenge

Kwik Trip is rapidly expanding, modernising, and streamlining its business, and have continued building new revenue streams into their business model. But with so many food offerings, and sales reaching 8 million customers per week, Kwik Trip needed to market their products in-store more effectively and efficiently at scale, to ensure they could meet rising demand without straining their workforce. Their existing model for print signage created limitations for real-time market testing to help with continued revenue development. The company decided digital signage was the evolution they needed to take that next step into the future of the business.

#### Solution

Wasting no time to address their in-store signage agenda, Kwik Trip found the right solution, with cost savings and superior service in their partnership with Philips Professional Display Solutions (PPDS). Since the start of installation, Kwik Trip and PPDS have closely collaborated to install digital displays across all 700 retail locations throughout the mid-west – creating immediate modernisation for the brand with a fresh look and feel across all their sites. And thanks to the Android backed System on Chip (SoC) of Philip's D-Line, Kwik Trip saw an estimated \$1.9 million in savings by eliminating the need for external media players. Further, with Digital Touch Systems content management software, Kwik Trip can easily manage all of their screens from corporate headquarters, allowing for day-parted messaging on their digital signage and menu boards.

#### Benefits

**Increase in Sales:** Since the installation, Kwik Trip has seen increased hot food sales for foods marketed with in-store digital signage, thanks to the use of vivid food photography – helping customers visualise what the food looks like under the wrappers.

**New Revenue Streams:** Thanks to Philips Digital Touch Systems software, which allows full remote control from Kwik Trip's headquarters, as well as support and management for their Android-powered screens, Kwik Trip now has the flexibility to test new products, day parting and messaging across all stores.

**Modern Look & Feel:** With promotions, information, and menus all displayed on vibrant screens, the aesthetic look and feel at all Kwik Trips have dramatically improved. Android: SoC platform led to \$1.9 million in savings and enabled faster and more versatile management, as well as automatic updates to ensure apps stay up to date.

**Warranty & Reliability:** Philip's 3-year advance exchange warranty entitles customers to a replacement device so they are not left without a faulty display. To date, the installation has maintained an astonishingly low failure rate of less than 1%.

# Visualise it in your space. AR<sup>c</sup>

See how your custom Philips Professional Display Solutions set-up will look with the Augmented Reality Configurator.

The user-friendly ARc app works on any mobile device to give an accurate visualisation of standalone signage screens and videowall installations.

- Accurately measures wall space and simulates positioning from various angles.
- Realistic representations of individual or multiple screens.
- Easily switch between models and sizes to get the perfect fit for your space.
- User-friendly interface that works on any connected mobile device with a camera.
- Available for download from the Google Play store and App store.
